The Nursing Degree is aimed at training general nurses with scientific and professional role in the different areas of the Health System and in the Health and Social Services, in public or private entities. It also allows access to Management, Teaching and Research jobs.

The new professional qualified in Nursing will have knowledge, skills and attitudes for understanding human responses to the health processes and illness during the life cycle, developing capacities in the people so that they can look after themselves or others.

Through their professional context, they must act based on the ethical and legal principles which govern the profession, paying professional opinions, making decisions and taking actions, ensuring the quality and safety levels established in the applicable legal and ethical regulations. The student will also be capable of understanding people, without prejudice, ensuring respect for their opinions, beliefs and values, guaranteeing the right to privacy and the right to access to postgraduate studies
